

room!MATE Room Management

Digital door signs, guiding screens for visitors and meeting room reservation management for large and small companies, public authorities, hotels, exhibitions and congress centers.

complete – effective – affordable

room!MATE is a turnkey pre-configured management solution for your meeting rooms. Installed within short time, configured and ready for use within minutes. Affordable even for a small number of meeting rooms and without ongoing license costs.

Use the various calendar views to quickly find free rooms. A reservation is done with a few mouse clicks. Elegant digital door signs with 10.1" screen display the events locally. Visitors do not need to look hard for their meeting room. Large screens at the entrance will display all events of the day and guide visitors to their venue.

Digital door signs display all necessary information about the meeting room utilisation. The screen shows the room identification, the two most current reservations of the day, a free/occupied symbol and the date and time. All these elements can be arranged freely in front of a bespoke background image. Select one of the existing layouts or create your own layout. If you like, one for each room.

Room identification: **Room: London**

Current reservation: **10:00 - 16:00**
Product Presentation
PortSignum GmbH

Subsequent reservation: **18:00 - 20:00**

The room!MATE calendar is accessible with a standard Internet browser from any PC in the network. There is no additional software installation required.

Various calendar views give an overview over the current booking situation. Room reservations are quickly done, the calendar avoids accidentally overlapping bookings. A powerful management of user privileges controls the access to the calendar and determines rooms reservation rights.
